# ELT Telescope Wavefront Control

Henri Bonnet<sup>\*1</sup>, Jason Spyromilio , Adam Rubin , and Michael Esselborn

<sup>1</sup>European Southern Observatory – Germany

## Abstract

The ELT telescope control scenario shall be presented. The presentation shall focus on the various sensors available to the telescope and discuss their usage. The phasing station sensing shall be presented as a component of the telescope characterisation and calibration strategy. The telescope GPAO (Guide probe AO mode) shall be described and the process of reaching the conditions for handover discussed.

**Keywords:** telescope : wavefront control : phasing
